iPhoto

Open iPhoto   [Media Folder on your Dock]
The First Time: If requested to Find or Create a Library, select Create a Library.
Toggle to the iPhoto Library.
The library will be set up for you and iPhoto will open. NO need to do this again.
Connect your camera.
[If bottom of screen says "No camera is selected", Go to File >> Import, and choose
the camera] The pictures will go directly into the iPhoto library

When finished importing, remember to Eject your camera icon before you unplug the
usb connector cable. [On the Mac, we Eject volumes by moving them to the trash.]

To Edit: Double click on the photo. Shows individual photo. Here you can enhance,
crop and retouch the photo. To see your entire Library again, press **Done**
Delete: Click on the photo and press the Delete Key. [Don't forget to
occasionally empty the trash - File >> Empty Trash

Information
title emerson_pier
date 3/30/2002
time 3:27:49 PM
rating · · · · ·
format JPEG Image
size 446 × 694
78 KB

Sort: Photos can be shown alphabetically or by date.
Type a new title to arrange the order in which you'd
like them to appear during the slideshow.

You can **drag files** [photos, images from
the web or your Documents Folder]
directly to the iPhoto Library.

Inserting an image from the Web
[good for historical photos etc]
Click once on the image you want while
pressing the ctrl key. [this is like a
right click on Windows]
Select download image.
Once downloaded, Drag the image into
the iPhoto Library.

Make Albums
File » New Album
Drag photos from the iPhoto
Library into the new album.

The Library contains all your
photos. When you create an album,
the photo is _copied_ to the album
rather than _moved_ there.

CD's and iTunes
To make music available for an iphoto show, you need to use itunes.
From your CD you can drag audio files right into the iTunes Library.
[Advice: Do this for music you will be using in classroom projects. Music that you
play for your own enjoyment can be played directly from the CD.]
